"POTENTIAL" Public Safety Power Shutoff (PSPS) Events for Southern California Edison (SCE) and San Diego Gas & Electric (SDG&E)

The California State Warning Center (CSWC) received notifications from Southern California Edison (SCE) and San Diego Gas & Electric advising they have notified customers of a *potential* Public Safety Power Shutoff (PSPS) due to an offshore wind event and critical fire weather conditions. CSWC has made notifications to State and Law Enforcement Agencies.

- The Cal OES State Operations Center is monitoring.

• SCE

- Per CUEA as of 11/13/18, 0732 hours, there are approximately 25 PSPS outages.
- SCE continues to monitor existing weather conditions as well as the Woolsey and Hill fires actively burning in the service territory.
- One circuit is partially proactively de-energized at this time (Anton circuit in Ventura County). Approximately 50 customers are impacted, and all appropriate notifications have been made.
- On 11/13/18 as of 0906 hours, SCE advised due to changing wind conditions and reports from the field and our meteorologists, Southern California Edison is no longer monitoring 21 circuits across four counties. The list below shows how many circuits remain for monitoring in each of our five impacted counties:
 - Ventura County – 0 circuits remain for monitoring
 - Los Angeles County – 0 circuits remain for monitoring
 - Riverside County – 16 circuits continue to be monitored
 - San Bernardino County – 7 circuits continue to be monitored
 - Orange County – 5 circuits continue to be monitored
- On 11/12/18, at approximately 2351 hours, SCE pro-actively de-energized a portion of the Energy 16kV out of Chatsworth Substation, de-energizing 35 customers. This circuit was previously identified for monitoring and customers were notified of the potential de-energization event. There were no identified critical care customers on the circuit.
 - Los Angeles, Orange, San Bernardino, Ventura, and Riverside counties have all been notified of identified PSPS circuits and are continuing to receive all associated maps and shapefiles as updates are made.
 - Customer notifications of PSPS de-energization and possible de-energization are ongoing.
 - Customers can find the most updated outage information on <https://www.sce.com/wps/portal/home/outage-center> or by contacting the SCE Customer Service Center at 1-800-655-4555.

SITUATION SUMMARY

- SDG&E
- Operational Update
- Per CUEA as of 11/13/18, 1339 hours, there are approximately 24,188 PSPS outages.
- SDG&E activated its Emergency Operations Center (EOC) on 11/11/18 at 1700 hours and has planned the following operational periods:
 - Tuesday 1700 through Wednesday 0500: Level 2 - Op Period 5 (Current Op Per)
 - Wednesday 0500 through 1700: Level 2 - Op Period 6 (Next Op Per)
 - Wednesday 1700 through Thursday 0500: Level 2 - Op Period 7
 - Thursday 0500 through 1700: Level 2 - Op Period 8 (added)
- Per CUEA as of 11/13/18 1647 hours:
 - SDG&E is looking to re-energize 16 circuits shortly, mostly coastal and one at Syquan.
 - SDG&E is developing a plan for Wednesday and Thursday to re-energize the remaining circuits in a quick, smooth and safe way.
 - Full restoration should be complete late Thursday, depending on the wind. In some areas, with wind between 28 and 35 MPH, they are unable to deploy helicopters for air patrol so there will be ground patrols only in those areas.

SITUATION SUMMARY

- SDG&E (Continued)

- 40 circuits, 8 tielines, and 4 substations are currently de-energized for safety impacting 24,159 customers.
- 22 circuits that were de-energized for safety were re-energized today restoring 1,651 customers.
- 9 circuits are currently without service due to forced outages not related to PSPS events impacting 3,120 customers.
- All impacted Medical Baseline Customers (MBL) were successfully contacted Monday, 11/13/18. Customer Service Field (CSF) made door-to-door contact with 22 customers that were not reached via phone.
- As weather conditions warrant, crews and contract firefighters will patrol power lines ensuring they are safe and free of debris prior to restoration.
- 25 contract firefighting crews are staged throughout the SDG&E service territory for this event.
- Six Community Resource Centers (CRCs) will be activated from 0800 to 1800 to provide up-to-date information on outages, water, snacks, and phone charging services.
- SDGE.com, News Center and social media are being consistently refreshed with relevant situational awareness throughout this RFW event. Restoring power quickly remains a top priority and will be challenging. Affected customers should be prepared with supplies for a few days without power.

- Communications Update

- SDG&E's EOC remains in close coordination with SD OES and State OES.
- Customer Service proactively notified over 31,000 customers notifying them of the upcoming RFW and potential PSPS event
- Customer Service, External Affairs and the PIO are working closely with Meteorology to ensure customer, agency and elected official notifications are timely and coordinated.
- SDGE.com, News Center and social media will be consistently refreshed with relevant situational awareness throughout this RFW event.
- The Customer Call Center will have a full complement of staff to address customer concerns.
- Lines were proactively patrolled to ensure system reliability.
- Circuits or TL's with abnormal configurations will be closely monitored through the event.
- All outages (safety related, unplanned, secondary) will be completely inspected for damage prior to restoration.
- Electric Control Centers have a full complement of staff through the event to swiftly address system issues.
- Adequate energy supply to maintain load, limited concern.
- A Mobile Command Trailer (MCT) has been deployed to support the Hill & Woolsey Fires for SoCalGas.

WEATHER OF CONCERN

Northern California

- Conditions will remain very dry with above normal temperatures, so elevated fire weather conditions will persist through the week.
- Widespread poor air quality due to smoke likely to continue.

Southern California

- Critical fire weather conditions will persist into Wednesday, though sustained speeds and gusts will likely be about 10-15 mph weaker than the numbers listed above.

- <http://www.wrh.noaa.gov/hazardSummary/?state=ca>

Active Weather Warnings, Watches and Advisories by County:

- <http://www.wrh.noaa.gov/hazardSummary/?state=ca&bycounty=1>

WEATHER SYNOPSIS BY REGION

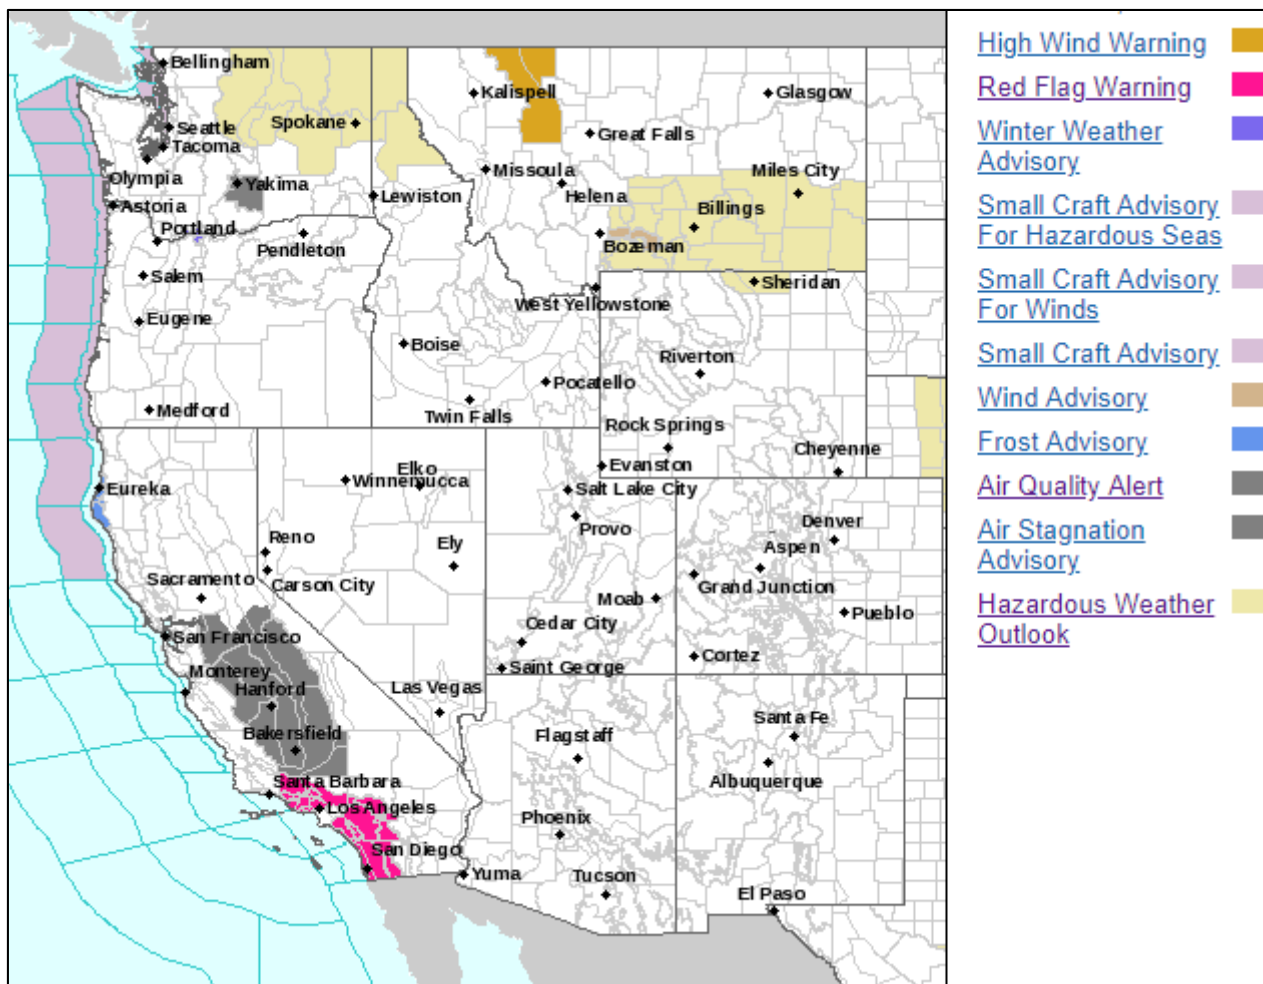

NORTHERN CALIFORNIA

- *** While there will be much lighter winds the rest of the week, conditions will remain unseasonably mild and very dry. ***
- High pressure will continue to produce warm, dry conditions into early next week.
- Widespread light winds across the region over the next 6 days except for somewhat stronger N to E winds developing Saturday night and lasting into Monday.
- No precipitation expected through early next week.
- Afternoon Relative Humidity (RH) will be low (5-15%) most afternoons this week with poor overnight recovery (10-25%) in many areas, particularly mid and upper slopes. Some valley locations that have been very dry may see RH will increase in a few days to afternoon minimums of 15-20% and overnight recoveries of 25-35%.
- Afternoon high temperatures will continue 5-10 degrees above seasonal normals with warmest inland areas mostly in the mid 70s. Overnight lows will be pretty close to seasonal values, and overnight frost/freezing conditions are likely to become a bit more widespread.

SOUTHERN CALIFORNIA

- A ridge of high pressure over California will weaken through this weekend. A series of Pacific troughs will move over the West Coast next week.
- Northeast winds of 20 to 40 mph with gusts to 60 mph will continue to surface across much of Southern California this morning. These offshore winds will decrease to 15 to 25 mph with gusts to 40 mph through this afternoon and then there will be only local gusty northeast winds this evening through Thursday morning. Winds will be light across the region Thursday afternoon through this weekend.
- Widespread single digit minimum humidity will continue through the end of this week and then increase into the teens this weekend. Very poor overnight humidity recovery will continue through Thursday.
- Temperatures will be a little below normal across the mountains today, with upper 40s and 50s and then warm to near normal through this weekend.
- Temperatures will be a little above normal in the valleys through this weekend, with 70s to low 80s.
- There will be below normal temperatures along with the possibility of showers next week.
